

## Department Sharps Injury Log

This log is designed to be used by department supervisors for recording and documenting employee injuries from contaminated sharps. Employee injuries must also be reported and documented according to established University procedure. The information in this log should be reviewed as part of ECP training but must keep the identity of the injured employee confidential. Employee input regarding safer medical devices, engineering and work practice controls should be documented in the ECP.

Date of Incident	Location of Incident	Type and Brand of Device	Incident Explanation / Details
